- Powdea Status inspection reports
- Automatic delivery of wearing parts
- Checking of scales
- Periodic inspection of cranes
- On-site technical support
- Scheduled preventive maintenance

**OnSiteCare™**  
Services on site

## Pre-emptive maintenance

- ✓ **Avoid unnecessary production interruptions with the automatic spare parts delivery service**
- ✓ **Ensure 100% accuracy by periodic calibrating the scales**
- ✓ **Ensure work safety by changing the filters periodically**

# Powdea Checkup

Ensure a high utilization rate of your equipment and secure your production with a regular periodic inspection by a Powdea mechanic

- Periodic inspection of the equipment
- At the same time, we fix the little problems
- You will receive a condition report for proactive maintenance

# Powdea Spares

- Regular delivery of wearing parts, e.g. filters once a year
- Your maintenance can replace parts when the moment is right or we can do it for you as scheduled maintenance
- Thanks to our digital inventory management system, you get a spare parts offer and spare parts delivery very quickly

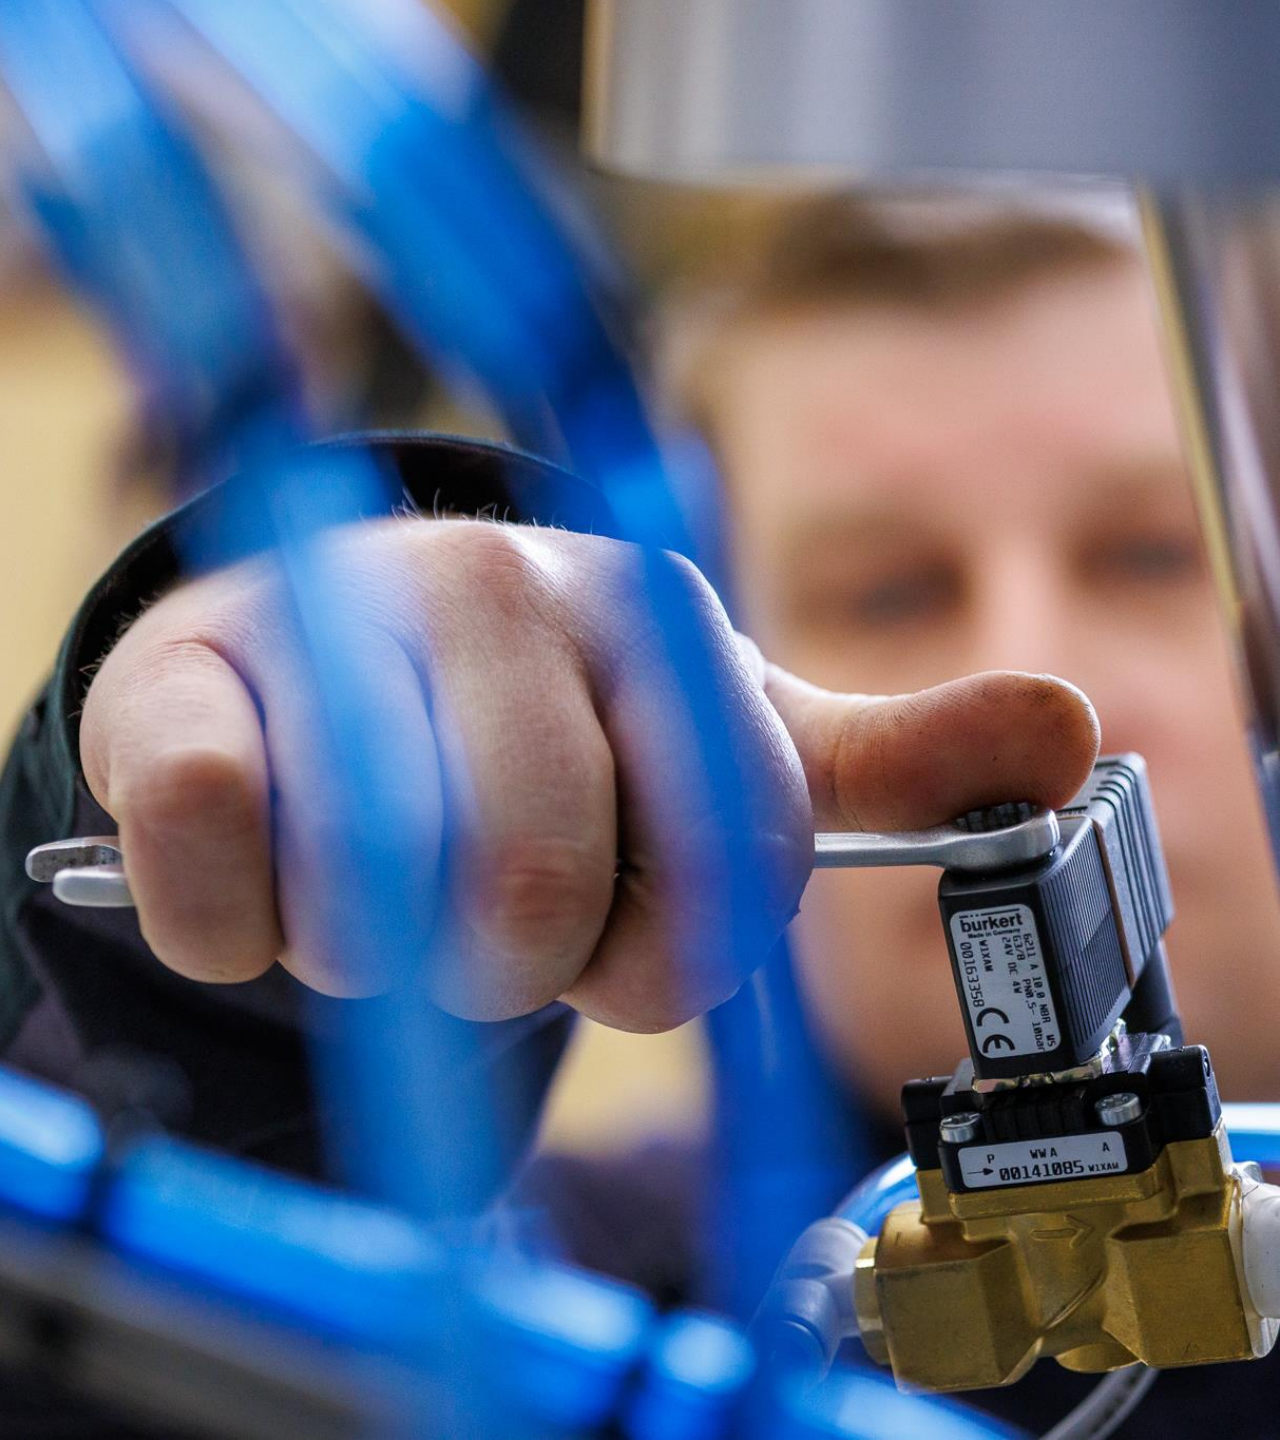

# Scheduled maintenance

Replacement of wearing parts of the equipment according to the preventive maintenance program

Depending on the configuration of the equipment, e.g

- Blower oil change
- Replacement the filters of receiver hoppers or dust extractor
- Replacement of transfer line suction filters
- Replacing the rubber of the bottom valve of the flour scale
- Replacement of flexible sleeves

# Scale check

- ✓ Ensure the correctness of the weighing data and accuracy of dosing
- ✓ Checking and calibration of dispensers and containers with scales
- ✓ Scale Check certificate

# Crane Check

- ✓ Ensure the safety of lifting equipment with a certified annual lift inspection
- ✓ Crane commissioning inspection in connection with the installation
- ✓ Annual inspection of the Cranes

Masters of Ingredients
